

THE EU TEXTILE STRATEGY: GOOD CLOTHES, FAIR PAY

This strategy will help the EU shift to a climate-neutral, circular economy where products are designed to be more durable, reusable, repairable, recyclable and energy-efficient. It aims to ensure that the textile industry recovers from the COVID-19 crisis in a sustainable way by: making it more competitive by applying circular economy principles to production, products, consumption, waste management and secondary raw materials directing investment, research and innovation.

We will hear from notable speakers their take on this strategy which is an integral part of the European Green Deal and aims to contribute to the EU carbon neutrality goals by 2050.

This event will take place online, on June 6th 2023 at 6pm. English will be the language of the webinar.
